Objective

To obtain and expand my knowledge in the field of project management, web development, computer programming, and project management.

Work Experience

Graphic Designer

1/2010 – Present Amana Graphics II LLC, Dearborn, MI

- Meet with clients to discuss their business needs for designs for menus, fliers, and logos.
- Designed a full scale import export system that allows users to view inventories of sales leads, buy or contact wholesalers that register in the system.
- Designed a book usage rating system that allows users to share their experience on book usage from fellow students.
- Created API's for Google Applications using PHP 5.
- Created Yahoo API connectors using REST.

Technologies used: HTML, CSS, Javascript, Ajax, PHP 5, MySQL 5, Adobe Illustrator/Photoshop, Coreldraw, and Macromedia Dreamweaver.

Web Developer

1/2004 – 12/2009 Marsal Design, Hamtramck, MI

- Responsible for setting up Linux (Fedora) systems, install PHP with custom configurations, setup DDOS protection software, and manage the system on a daily basis.
- Designed a complete Aviation scheduling system that allows schools to register and use the system to organize their school.
- Wrote several cron jobs for PHP projects that have been done in PHP 4 that required constant update.
- Done some cross server scripting that required the coding be in BASH.
- Implemented bi-lingual (English and Arabic) templates to many projects on hand.

Technologies used: HTML, CSS, Javascript, Ajax, PHP 4/5, MySQL 4/5, Macromedia Dreamweaver, BASH, Linux.

Computer Technician

5/2000 - 8/2004 Amana Printing, Brooklyn, New York

- Responsible for diagnosing computer hardware or software problems and estimating total cost plus labor.
- Diagnosing and fixing PC Desktops for hardware problems

including severe virus and spyware attacks.

- Provided data recovery for in-accessible, slightly damaged, and erased hard drives.
- Built simple applications using VB6 and PERL.

Technologies used: VB6, PERL, Windows, Macintosh and Linux.
